

Welcome...

to the 2nd European LINK Conference on Passenger
Intermodality

05/06 November 2009, Bucharest

Dr. Ulrike Reutter

ILS - Research Institute for Regional & Urban Development

**Integrated
transport
policy &
planning**

**Integration of
different decision
makers at same
level (horizontal)**

**Integration
of different
modes and
means of
transport**

**Integration of different
trip purposes
(commuters, irregular
trips, tourist...)**

**Integration of
different vertical
policy levels
(national,
regional, local)**

**Integration of
different policy
sectors
(transport,
land use,
environment...)**

**Integration of different
stakeholders
(operators, authorities,
politicians, citizens,...)**

**Integration of
different types of
measures (new
infrastructure,
change of capacity,
„soft measures“,...)**

We aim at...

Presentation and discussion of practical implementation and promotion of solutions concerning

→ Connection of long distance transport to local & regional networks

- solutions for strategic transport planning on local and regional level are basic and lead to**
- regional coordination and cooperation on information, ticketing, tariff schemes**
- support from national and EU level**

We aim at...

Presentation and discussion of practical implementation and promotion of solutions concerning

→ Connection between long distance transport and the urban environment - interchanges and their surroundings

**□ station development:
integration with urban planning as well as with regional transport concepts**

We aim at...

Presentation and discussion of practical implementation and promotion of intermodal solutions concerning

→ Benefits of intermodality

(e.g. improved efficiency, customers, non-transport impacts, e.g. on environment, local economies)

Discussing the impacts (e.g. contrasting to countries rapidly developing towards intermodality, like Spain)

→ Funding opportunities and financing models

in particular:

Looking forward the presentations – discussions – talks – networking ...
